

PECB INSIGHTS 2021
CONFERENCE

15-16 November 2021

About the PECB Insights Conference 2021

This PECB Insights Conference includes a series of virtual round-table discussions, with 12 panels of experts sharing their thoughts in English, French, and Spanish. Participants can gain new insights on the latest trends and valuable information on a range of chosen topics.

The conference is a great opportunity to meet professionals of your field from around the world. Connections made at PECB Conferences are long-lasting and can create new business ventures.

“Another insightful PECB Conference comes to an end. With an outstanding selection of panelists and moderators, this Insights Conference provided some key discussion points into the latest trends and developments in the world of Information Technology, Security, and Privacy, with topics centered on AI, cybersecurity, blockchain, IoT, business continuity, and more. For these and many other questions you might have, or seek to get thorough answers, our experts provided detailed information in the virtual roundtable discussions of the conference.”

Fitim Rama, CEO of PECB

5G: Do the Benefits Outweigh the Potential Cybersecurity Risks?

Language: French

Humanity has gone to great lengths looking for comfort and a better life. 5G can provide connectivity with lower latency and is significantly faster than previous technologies. It has more capacity than its predecessor and can advance IoT, personal communications, and even impact AI. Although benefits of 5G are numerous, the question remains: Is it worth the risks?

The Moderator

Bruno Verachten

The Panelists

Bechir Sebai

Luc Samson

Cryptocurrency and Blockchain: Upcoming Trends and Risks in the New Decade

Language: English

Can cryptocurrency and fiat money coexist? Can cryptocurrencies replace fiat money at some point? State governments are already proposing digital currencies and even making current cryptocurrencies national. Such actions come with risks, mostly related to security. This session discusses the topic and provides answers to many related questions.

The Moderator

Stella Makona Simiyu

The Panelists

Khurram Schroff

Josina Rodrigues

Nuno Cortesão

Business Continuity: Is Remote Work the Best Way Forward?

Language: Spanish

Remote work has helped a large part of the global workforce to continue working during a global pandemic. In addition, it has significantly improved the productivity and mental well-being of many. However, remote work also has its drawbacks, such as isolation, increased distractions, and lack of community and teamwork. Known as The Great Resignation, this period has shown people jumping out of the boat during the storm and valuing their time more than they did previously. Panelists have discussed the best approach to business continuity post-pandemic.

The Moderator

Jorge Garibay

The Panelists

Manuel Collazos

Information Security by Design: The Future of ISO/IEC 27001

Language: French

Confidentiality, integrity, availability are the three main objectives of information security. They are also an essential part of ISO/IEC 27001, an international standard created to ensure information security and prevent unauthorized access, disruption, and destruction. Join information security experts, as they discuss upcoming trends and the future of ISO/IEC 27001.

The Moderator

Abdelmalek Najih

The Panelists

Michele Copitet

Judicaël Blanc

Data Privacy in a Digital World: A Necessity or a Luxury?

Language: English

This session provides a detailed analysis by case experts on how data can be protected in a world that is digitalizing rapidly. The session also discusses the role of data protection in digital transformation: a necessity or a luxury that only a few will be able to afford.

The Moderator

Daniela Cireasa

The Panelists

Sherrif Issah

Tudor Galos

Vincenzo Tiani

Cloud Security: The Challenges in the Times of Growing Cybersecurity Attacks

Language: Spanish

Protection from malware, phishing, DoS attacks, and numerous other cyber-attacks is a top priority for organizations that have embraced digital transformation. This session covers cybersecurity threats related to cloud computing. Panelists also discuss possible drawbacks to cloud computing and the overall advantages and disadvantages.

The Moderator

Daniel Robles

The Panelists

Pablo Barrera

Joseline Hernández

Digital Transformation Post Pandemic: Security and Privacy Concerns

Language: French

The pandemic has accelerated digital transformation on a global level. We are in a position where most organizations have to consider this process and its rapid growth, as well as the importance of security and privacy in digitalization. These questions have been discussed in this session from a combination of skilled, professional panelists.

The Moderator

Josina Rodrigues

The Panelists

Valeriane Saka

Karim Ganame

Robert Hellwig

Artificial Intelligence in the Next Ten Years: Modern Warfare or Modern Wealth-fare?

Language: English

AI is a very innovative field of study that has been increasingly trending in the past decades. It has improved several fields, including customer service, smart homes, cybersecurity, and web searches. Yet, the ethical implications of this fairly new science, as well as the nexus between warfare and wealth-fare, are yet to be clearly determined.

The Moderator

Solomon Ugah

The Panelists

Arthur Donkers

Adarsh Panda

Andra Fecioru

Hacking the System: The Growing Necessity for Lead Ethical Hackers

Language: Spanish

This session discusses the ongoing need for skilled programmers and experts who can gain access to computer systems to identify potential threats and data breaches in a network. Join this session to get a better insight on “white hat” hacking and learn more about its importance.

The Moderator

Julio Balderrama

The Panelists

Juan Dávila

Eduvigis Ortiz

When Physical Meets Digital: The Growing Potential of IoT for a Seamlessly Integrated Digital Future

Language: French

The Internet of Things is a constantly growing network and a perfect example of Physical Meeting Digital. A group of handpicked panelists explore the future of IoT in a highly digital future.

The Moderator

Walid Abdaoui

The Panelists

Yassir Karroute

Nabil Aly

Guenaëlle Blanchet

CMMC: A Role Model across the Defense Industrial Base with Implications for 300,000+ DoD Contractors

Language: English

This session discusses CMMC, a unifying standard and a program of cybersecurity in the United States Government, and its exemplar model across the Defense Industrial Base, aiming at process institutionalization. The panel also discusses the implications for those providing services to military departments of a government.

Moderator & Panelist

Anna London

The Panelists

Regine Bonneau

Leighton Johnson

Data Breaches: Do We Need More Regulations or Should We Start Implementing End-to-End Encryptions?

Language: Spanish

Excessive amounts of data breaches and unauthorized leaks are pushing people and organizations to think about the best possible solutions. A group of experts leading this session discuss the most suitable management methods and controls that prevent data breaches.

The Moderator

Jorge Edo Juan

The Panelists

Eric Balderrama

Laura Martínez Retamar

A low-angle, upward-looking photograph of several modern skyscrapers with glass facades, set against a clear blue sky with a few wispy clouds. The buildings are arranged in a way that they appear to converge towards the top center of the frame, creating a strong sense of height and architectural scale. The lighting is bright, suggesting a clear day.
