# PECB INSIGHTS VIRTUAL CONFERENCE 2020

Digital Transformation, Security, and Privacy
November 16-19, 2020

## About the PECB Insights Virtual Conference

This year marks the first time that PECB has hosted a virtual Insights Conference. The decision to continue with a virtual conference arrived from the situation with the COVID-19 pandemic around the globe and the potential health risks it entails. We prioritized the health and safety of our panelists, moderators, and attendees and remained committed to making education and career advancement available to anyone, regardless of the situation. For this reason, the PECB Insights Virtual Conference 2020 was completely free to attend.

Overall, the PECB Insights Virtual Conference has been a great success. With a total of eight panel discussions, four in French and four in English, the conference had over 2,300 registrants.

"We have had a stellar selection of panelists, from a large array of professional backgrounds and fields of expertise, all for you, our registrants that have made this possible by continuously showing your support. At PECB, we believe that giving back to the community during challenging times is the least we can do, which is why we have decided to make this year's PECB Insights Virtual Conference completely free of charge to attend."

**Eric Lachapelle, CEO of PECB**

# Dealing with the unpredictable – Different ways to implement business continuity to best overcome unpredictable events such as the COVID-19 pandemic

**Language:** French

The year 2020 has brought on one of the greatest challenges for individuals and businesses alike. # AI Weaponization by Hackers:
# The risks of cyberspace security now and in the future

**Language:** English

The world of Artificial Intelligence is growing exponentially with the many advancements in technology. AI is aimed at making our lives easier through machine learning; however, it is still unknown how secure is it when it comes to hackers and its weaponization. Could we be facing a future where AI can be used solely for purposes of destruction? To watch this session, click the video below.
